SAMPLE CV · FICTIONAL DETAILS

Alex Morgan

QUALITY ENGINEER

alex.morgan@example.com · +1 (202) 555-0101 · Example City

PROFESSIONAL SUMMARY

Quality Engineer experienced in manual and automated testing for web applications. Comfortable translating requirements into test cases, investigating defects, and working with delivery teams to improve release quality.

EXPERIENCE

Quality Engineer

2023 – Present

Example Software Company

- Maintain automated checks for key user journeys using Playwright and TypeScript.
- Plan functional and regression testing, investigate failures, and report actionable defects.
- Collaborate with developers to integrate useful test coverage into delivery pipelines.

Junior Software Tester

2022 – 2023

Example Digital Studio

- Create and execute test cases for demonstration web and API applications.
- Document test results and support defect triage with the project team.

TECHNICAL SKILLS

Test automation
Playwright, Cypress, TypeScript

API and data
REST API testing, SQL, test data preparation

Quality practices
Exploratory, functional and regression testing

Delivery
Git, CI/CD, defect reporting, Agile teamwork

EDUCATION

BSc in Computer Science

2018 – 2022

Example University
